Issue:01

Report: Missing Attachments at Follows-up section

Issue Description:

While editing a follow-up, the attachments section does not display the uploaded files. The screenshot below shows the "Existing Attachments" section, but the files are missing from the interface. This issue needs to be addressed to ensure that attachments are properly uploaded and visible in the system.

Steps to Reproduce:

1. Navigate to the **Bechakeena admin panel**.
2. Open a follow-up (ex. **Buyer: Mithilaa**).
3. Attach a file in the **Attachments** section.
4. Save and edit the follow-up.
5. Check the **Existing Attachments** section. The files should appear here, but they are not visible.

Expected Result:

Attachments should appear in the **Existing Attachments** section after uploading and saving.

Actual Result:

Attachments are missing from the **Existing Attachments** section.

Impact:

This issue affects the visibility and management of attached files, causing inconvenience to the users.

Suggested Solution:

Investigate the backend code for the attachments section and verify if the file upload process is being handled correctly. Ensure that attachments are being saved and retrieved from the database as expected.

The screenshot displays the 'Edit Followup' page in the Bechakeena system. The form is pre-filled with the following information:

- Buyer:** Nurun Nahar [uuuu]
- Order:** INV#175949517835
- Assign To:** Administration
- Title:** Good Product
- Priority:** High
- Due Date:** 10/19/2025 11:59 PM
- Agenda:** No
- Attachments:** Choose Files (No file chosen)
- Existing Attachments:** A table showing one attachment: '1774765735_Barcodes_20260311_033115.pdf'.
- Remarks:** (Empty text area)

The left sidebar contains navigation links for reports (Purchase, Cash Flow, Buyer, Supplier) and settings (General, Currency, FAQ, OTP Logs). The 'FOLLOW-UPS' section is active, showing 'Customer Follow-ups' and 'Create A Follow-up' options.

Issue: 02

Incorrect Due Date Calculation in Customer Follow-Up

Description:

In the "Create Customer Follow-ups" section, the due date calculation is not functioning correctly. The date and time values are not being handled properly, leading to inaccurate due dates, especially when using word formatting.

Steps to Reproduce:

1. Navigate to the "Create Customer Follow-up" page.
2. Select a buyer and enter details.
3. Set a due date for the follow-up.
4. Observe that the due date does not reflect the correct time/date.

Expected Result:

The due date should accurately display the correct time and date, in the expected format (ex . 03/29/2026 11:59 PM).

Actual Result:

The due date is calculated incorrectly, which can cause confusion and errors in follow-up scheduling.

Suggested Fix:

Review and correct the due date calculation logic, ensuring proper handling of date/time values and correct formatting when inputting dates.

The screenshot shows the 'Create Customer Followups' page in the Bechakeena admin dashboard. The page has a sidebar with navigation links like 'Product Performance Report', 'Purchase Report', 'Cash Flow Report', 'Buyer Report', 'Supplier Report', 'FOLLOW-UPS', 'Create A Follow-up', and 'SETTINGS'. The main form area includes fields for 'Buyer' (a dropdown menu), 'Order' (a search and select dropdown), 'Title' (a text input), 'Priority' (a dropdown menu set to 'Medium'), and 'Due Date' (a date and time picker showing '03/29/2026 11:59 PM'). There is also an 'Agenda' text area and an 'Attachments' section with a 'Choose Files' button. A 'Back to Followups List' button is in the top right. The system clock at the bottom right shows '12:35 PM 3/29/2026'.

Issue: 3.

Advance Payment Amount Field Visibility

Description:

When creating a new entry or updating a record, the "Advance Payment Amount Percentage" field remains visible even when the option "Advance Payment Required" is set to "No." This behavior creates confusion, as users should not be required to input any percentage if no advance payment is required.

Expected Behavior:

- If the "Advance Payment Required" field is set to **No**, the "Advance Payment Amount Percentage" field should be **hidden** and should not be visible to the user.
- If the "Advance Payment Required" field is set to **Yes**, the "Advance Payment Amount Percentage" field should be **visible**, allowing the user to input the relevant percentage.

Steps to Reproduce:

1. Navigate to the "Create Customer Follow-Up" page.
2. Set "Advance Payment Required" to **No**.
3. Observe that the "Advance Payment Amount Percentage" field is still visible.
4. Set "Advance Payment Required" to **Yes** and verify that the field becomes visible again.

Impact:

- Users might accidentally input values into the "Advance Payment Amount Percentage" field when it's not necessary.
- This creates a confusing user experience and can lead to incorrect data being entered.

The screenshot shows a web browser window with the URL <https://sales.gearup...>. The form is titled "Thumbnail Image (optional)" and includes a file upload area with a "Choose File" button and the text "No file chosen". Below this is a "Status" dropdown menu set to "Active". The "Advance Payment Required" dropdown menu is set to "No" and is highlighted with a red box. Below it, the "Advance Payment Amount Percentage (%)" input field is visible and contains the value "10", also highlighted with a red box. This demonstrates the bug where the percentage field is visible even when advance payment is not required.

Issue 04

Report: Missing Phone Number Validation at Buyer

Issue Description:

The phone number field under **Edit Buyer** lacks proper validation. In the screenshot below, the system allows the input of invalid phone numbers (e.g., without checking for correct format). This could lead to errors in data entry and possible issues with communication or order processing.

Steps to Reproduce:

1. Navigate to **Bechakeena admin panel** and go to the **Edit Buyer** page.
2. Input a phone number in the **Phone** field that does not follow a valid format (e.g., no country code, fewer digits, or extra digits).
3. Save the form.
4. Notice that the system accepts the invalid phone number without any warning or error message.

Expected Result:

The phone number field should have validation to ensure the number follows a correct format, such as:

- Only numbers allowed.
- Proper length (ex. 11 digits for Bangladeshi phone numbers).
- A prompt error message should appear if the format is incorrect.

Actual Result:

The system does not validate phone numbers and allows invalid formats to be saved.

Impact:

This issue leads to incorrect or incomplete data being entered into the system, potentially resulting in communication problems or order fulfillment issues.
